PUBLIC WORKS.

Notification No. 331—1933, *dated 10th May* 1897.

The Government of Mysore have been pleased to sanction the following rules for the regulation of House-connections from the Chamarajendra Water-Works within the limits of the City of Bangalore.

By Order,

C. BOWEN, *Colonel*,
Secy. to the Govt. of Mysore, P. W. D.

Rules for the Regulation of House-connections from the Chamarajendra Water-Works.

1. The supply of water from the Chamarajendra Water-Works being intended exclusively for *bonâ-fide* domestic purposes, the water drawn therefrom, whether from public fountains and taps or from private house-connections, shall not be used for any other purpose whatsoever. A supply of water for domestic purposes shall not include a supply of water for horses or for washing carriages, where such horses or carriages are kept for sale or hire, or a supply for any trade, manufacture or business, or for fountains or for any ornamental or mechanical purpose, or for watering gardens or roads. Water which has been used for washing, bathing or other domestic purposes, may be collected and used for gardening or other non-domestic purposes, but on no account should pure water be drawn from the taps for these purposes. Provided that, with the special permission of the Water-Supply Department, water may be taken from the fountains and hydrants for watering public roads on special occasions.

2. Until further orders, private connections to houses from the Chamarajendra Water-Works will be limited to houses whose annual rental value is not less than Rs. 300 (three hundred), and to localities where the capacity and pressure of the public water-mains permit of such connections being made without detriment to the street service.

3. For every house-connection there shall be provided and maintained in due working order, a water-meter of approved size and description for the accurate gauging of the water consumed.

4. All pipes, taps, water-meters and works required for a house-connection, shall be of such dimensions, character and material, as the Water-Supply Department may approve, and they shall always be under the control of the Water-Supply Department and shall in no way be interfered with by any others, and they shall be provided, renewed and repaired by the Water-Supply Department at the expense of the house-holder applying for, or desiring, the connection, who shall pay in advance the estimated cost. The whole should be fully paid for before the house-connection is permitted to be used.

5. The Water-Supply Department shall determine the size of each house-connection with due regard to the capacity and pressure of the public water-mains of the locality.

6. The house-connection in any case is liable to be stopped or the supply reduced by the Water Supply Department, without any notice or assigning any reason. But when the stoppage is over an extensive tract, or is due to exigencies which are previously foreseen, such previous notice as is possible under the circumstances will be given by the Water-Supply Department. If the Water-Supply Department has reason to believe that wasteful or unauthorized use is made of water drawn from any house-connection, it shall be its duty to stop such connection forthwith under this rule.

7. The quantity of water which a house-holder will be allowed to draw from his house-connection (free of any charge other than the general water-rate to be assessed upon the annual rental value of his house and premises) shall be regulated in accordance with the scale hereunder :—
